**syn** IDEA, CONCEPT, CONCEPTION, THOUGHT, NOTION, IMPRESSION *shared meaning element*: what exists in the mind as a representation (as of something comprehended) or as a formulation (as of a plan). IDEA is equally applicable to a mental image or formulation of something seen or known or imagined, to a pure abstraction, or to something assumed or vaguely sensed (that's not my *idea* of a good time) (try to get an *idea* of the complexity of the problem) CONCEPT in precise use applies to a generic idea conceived by the mind after acquaintance with instances of a category (the child as he grows develops such *concepts* as "chair", "dog", and "house") but in frequent, if sometimes criticized use *concept* is applicable to any formulated and widely accepted idea of what a thing should be (we must expand the *concept* of conservation to meet the imperious problems of the new age —J. F. Kennedy) CONCEPTION, though often interchangeable with *concept* in the latter's more general use, can distinctively stress the process of imagining and formulating (too often a writer's *conception* exceeds his capacity for execution) THOUGHT is likely to suggest the result of reflection, meditation, or reasoning rather than of imagining (a child's *thought* about God) NOTION can apply to a vague, tentative, or chance idea (most of us retain the *notion* that all technical change is progress, is necessarily good —R. M. Hutchins) but in precise use it can come close to *concept* in suggesting a general or universal idea (arriving at the *notion* of law —Irving Babbitt) or to *conception* in denoting the meaning content assigned by the mind to a term ([they] have no adequate *notion* of what we mean by causation —Edward Sapir) IMPRESSION usually implies the presence of external stimulation that gives rise to an often vague idea (I had an *impression* that the door opened softly)

*syn* IMMORAL, UNMORAL, NONMORAL, AMORAL *shared meaning element*: not moral. In spite of their common element of meaning these words are rarely interchangeable without serious loss of precision. IMMORAL implies a positive and active opposition to what is moral and may designate whatever is discordant with accepted ethical principles or the dictates of conscience (immoral conduct) or, in weakened use, with accepted social custom or general practice (refusal to acknowledge the boundaries set by convention is the source of frequent denunciations of art as immoral — John Dewey) Unmoral, nonmoral, and amoral all, in contrast to immoral, imply a passive negation of what is moral. UNMORAL can imply a lack of ethical perception and moral awareness (infants and idiots are unmoral and without moral responsibility) or it can come close to conscienceless in implying disregard of moral principles (the great unmoral power of the modern industrial revolution — F. L. Wright) Occasionally, it, along with nonmoral and amoral, implies that the thing qualified is not a fit subject for ethical judgment. While nonmoral and amoral are frequently interchangeable, NONMORAL may be preferred when what is qualified is patently outside the realm of moral judgments, and AMORAL can be applied discriminatively to something not customarily or universally so exempt; thus, life in the abstract is a nonmoral concept but a particular human life may well be amoral; perspective is a nonmoral aspect of painting but a painter's approach is likely to be amoral, even though some critics consider the result immoral. *ant* moral

**syn** LESS, LESSER, SMALLER, FEWER *shared meaning element*: not as great (as in size, number, worth, or significance) as some expressed or implied other. In spite of the common element of meaning these terms are rarely interchangeable without loss of precision. LESS in its most characteristic use applies to matters of degree, value, or amount, is opposed to *more*, and chiefly modifies collective nouns or nouns denoting a mass or an abstract whole (<the moon gives less light than the sun>) Less is sometimes applied

to matters of number, but the usage is decried by many careful writers and speakers. LESSER applies especially to matters of quality, worth, or significance and is opposed to *greater* or *major* (<God made . . . the lesser light to rule the night — Gen 1:16 (AV)>) In vernacular names of plants and animals *lesser* specifically implies distinction based on relative smallness (<the lesser yellowlegs> (<lesser celandine>) SMALLER is applicable especially to matters of size, dimension, or quantity and is opposed to *larger* (<the advantage of smaller cars> (<use a smaller amount of seasoning>) FEWER applies specifically to matters of number and therefore regularly modifies a plural noun. Thus, “he has fewer (not less) spendable dollars this year,” but “he has less (not fewer) money to spend than he used to.” Occasionally the distinction between quantity and number is obscured and either *fewer* or *less* is appropriate (<seasonal workers who average fewer (or less) than six months’ work a year>) **ant** more

**syn** MAKER, CREATOR, AUTHOR *shared meaning element*: one who brings something new into being or existence. Written with an initial capital letter all three terms designate God or the Supreme Being; without the capital they ascribe comparable but not equivalent effects and powers to a person. MAKER is likely to imply a close and immediate relationship between the one who makes and the thing that is made and an ensuing responsibility or concern for what is turned out; hence, God is often called one's Maker (as in hymns and prayers). In many of its human applications (as in *kingmaker*, a *maker* of men, a *maker* of phrases) *maker* suggests the use of appropriate material as an instrument through which one gives form to one's own ideas. CREATOR stresses a bringing into existence of what the mind conceives; in application to God it is likely to emphasize omnipotence and the greatness of his works (touched their golden harps, and hymning praised God and his works; *Creator* him they sung — John Milton) In relation to human endeavor *creator* is likely to suggest originality and delving into the unknown (they are genuine *creators*: they do not describe nor interpret reality as much as construct it — Howard Moss) AUTHOR applies to one who originates and is the source of something's being and is, therefore, wholly responsible for its existence. It is applied to God chiefly in the phrase "Author of one's being" when the reference is to the gift of life and its attending circumstances. In application to persons it is aptly applicable to a writer (the *author* of several books) or to one who (as a founder, an initiator, or an inventor) brings something new into existence (the policy of which he was principally the *author* — Hilaire Belloc)

*syn* 1 MODERN, RECENT, LATE *shared meaning element*: having taken place, existed, or developed in times close to the present. In spite of the common element of meaning these words are seldom freely interchangeable without loss of precision. MODERN may date anything that is not ancient or medieval (wrecks of ancient galleys, medieval ships, and modern dreadnoughts — William Beebe) or anything that bears the marks of a period nearer in time than another (ornate mansions of a bygone era mingle with more modern concepts of architecture — *N. Y. Times*) or, less clearly, may apply to whatever is felt as new, fresh, or up-to-date (what is modern today and up-to-date . . . becomes obsolete and outworn tomorrow — F. D. Roosevelt) In all these uses a change or contrast in character or quality is implicit. RECENT usually lacks such implications and applies to a date that approximates the immediate past more or less precisely according to the nature of the thing qualified; thus, "the Recent geological epoch" dates back thousands of years but extends to the present time; "Shakespeare is a more recent author than Chaucer" implies only a comparative relation; "we have all the recent books on the subject" implies an absolute relation to the near or immediate past (recent news) (a recent change of plans) LATE usually implies a series or succession of which the one described is the most recent in time (the late war)
